Summary

I am Yigithan, a web development expert with expertise in PHP, Python, Javascript, and front-end development. I have completed several projects and provided access to over 10 million users. I prioritize customer satisfaction and am always seeking feedback. I am currently developing websites for personal and professional projects and focus on design and user experience. I am seeking employment opportunities to expand my reach and create projects that improve people's lives.

Work experience

Front-End Developer

2022/06 - 2022/12

Izmir Teknoloji

I designed websites for Izmir Municipality, serving 6 million people, using ReactJS, Javascript, HTML, CSS, Bootstrap, and Tailwind. My designs not only looked great but also provided high level of user experience and smooth performance. I also made sure they were mobile-friendly. Teamwork and collaboration were key to making these projects a success. I always make sure to listen to my team's ideas and work together to find the best solutions.

Founder - Full Stack Developer

2019 - present

Dakti Network

As a co-founder of DaktiNetwork, I have accumulated a significant amount of experience in managing outsourced projects. My expertise encompasses both technical and strategic aspects, as well as developing and maintaining customer relationships. Throughout my tenure at DaktiNetwork, I have gained proficiency in various technologies such as HTML, CSS, Bootstrap, Javascript, PHP and SQL Server. Despite being a small company, we have successfully established a positive and collaborative work environment. I am confident that my experiences at DaktiNetwork have equipped me to effectively handle a diverse range of challenges and collaborate with clients.

Full-Stack Developer

2021/07 - 2022/06

OtelFiyat.com

I built a CRM panel and an internal admin panel using a bunch of different technologies, like Figma, HTML, CSS, Bootstrap, Javascript, jQuery, PHP and Python. I also set up a database using MySQL. Now, hundreds of employees are using the system and it's helped the company run more smoothly. On top of that, I made some automation softwares using Python Selenium, which has been a huge help for a few teams. Overall, working on these projects helped me get better at my job and grow as a person.

Projects

IZBB SKGA IZTECH

2022/10 - 2022/11

The "Sustainable Urban Development Network" project is designed to make İzmir a more sustainable and European-focused city by organizing events on topics such as climate and nature, and addressing issues such as poverty and hunger. The project features a page displaying locations of the network using Google Map API, various forms like contact form, application form, pop-ups, galleries, news, events, and videos related to the Sustainable Urban Development Network.

IZBB TUHIM IZTECH

2022/09 - 2022/10

I was part of a team that developed a website for the Public Transportation Services Directorate (TUHIM) of İzmir Metropolitan Municipality to improve public transportation services in İzmir. I was responsible for front-end development using HTML, CSS, and JavaScript, and implemented a form for companies to apply for partnership opportunities. This project gave me experience in front-end development and helped improve public transportation services in İzmir.

IZBB Koy Tiyatrolari IZTECH

2022/08 - 2022/09

I was part of a team that developed a website for İzmir Village Theatres, designed to increase interest in village theatres in İzmir and encourage attendance at educational events. I was responsible for front-end development and creating a form for users to sign up for events. This project gave me experience in front-end development and helped people in İzmir learn more about the village theatres.

IZBB Konusan Agaclar IZTECH

2022/08 - 2022/08

I developed a user-friendly interface for a project that provides detailed information about trees in İzmir by scanning QR codes, using HTML, CSS, JQuery, Javascript and Bootstrap. I gained experience in front-end development while working on a project that serves the community.

Infrastructure Change OtelFiyat.com

2022/03 - 2022/04

I redesigned the user interface for otelfiyat.com using HTML, CSS, Bootstrap, JQuery, Javascript to enhance user engagement, usability and purchasing psychology. The project helped me gain practical experience in front-end web development and UI/UX design, and develop my skills in these technologies. The final product showcases my abilities as a developer and designer.

Auto Entry Automation OtelFiyat.com

2022/02 - 2022/02

I used Python Selenium to automate the login process for a social media database, improving user efficiency and streamlining the login process. This project showcases my critical thinking, creativity, proficiency in Python and Selenium, and dedication to improving system functionality.

Graduation Project

2020/09 - 2021/06

I developed an e-commerce marketplace using React Native for my university capstone project, with a focus on user experience across devices. It improved my skills in full-stack development using React Native.

Internship Project

2021/01 - 2021/04

I developed an online appointment scheduling app for hairdressers during my internship, using HTML, CSS, PHP, Javascript, PHP, MySQL and Twilio API. The project improved my full-stack development skills.

Hobbies & Interests

Reading, Travelling, Playing various instruments (guitar, ukulele, keyboard), Football, Tennis, Basketball and Table Tennis

Authorship and Publications

[Dijital Dünyanın Sırları: Yiğithan ile Web Geliştirmeye Giriş \(2023\)](#)

This book provides a comprehensive introduction to web development and digital technologies. Covering everything from basic programming concepts to complex application development, it caters to readers at all levels. Written in a practical and accessible language.

Volunteering and Community Engagement

- **28th Term Cumhuriyet Halk Partisi (CHP) Ankara Deputy Candidate (2023)**
Actively participated in community outreach activities as a candidate for the deputyship, advocating for policy changes and addressing constituent concerns. I was the youngest candidate in Ankara during this term.
- **Halkçı Liseliler (2015)**
Volunteered with this high school youth organization affiliated with the CHP, working to promote and defend the rights and interests of students.
- **Founder and President, Virtual Will Platform**
I am the founder and president of the Virtual Will Platform, an organization dedicated to empowering digital citizens and advocating responsible online behavior. I manage strategic planning, outreach efforts, and daily operations.
